SUMMARY

Skilled in designing, building, and scaling web applications. Proficient in React.js, Node.js, Express, MongoDB, and PostgreSQL. Passionate in writing clean code, performance optimization, and delivering user-centric solutions. Strong full-stack engineering skills in backend API architecture, authentication systems, enterprise workflow, database relationships, transactional email systems, and reusable frontend component design.

SKILLS

- ✓ Proficient in building RESTful APIs and microservices
- ✓ Experience with relational and non-relational databases
- ✓ Strong understanding of software design patterns and SOLID principles
- ✓ Familiar with agile and scrum development methodologies and sprint cycles
- ✓ Experience with CI/CD pipelines and basic DevOps practices

TECH STACK

Languages: JavaScript (JS), TypeScript (TS), HTML5, CSS3, SQL, Python 3, Java, C#

Frameworks: React.js, Node.js, Express, React Native, Next.js

Tools & Platforms: Git, GitHub, Docker, AWS (EC2, S3), CI/CD, Vercel, Render, VS Code, Postman

Databases: MongoDB, PostgreSQL (Postgres), MySQL, Redis

Methodologies: Agile, Scrum, Test-Driven Development (TDD), Code Review

EXPERIENCE

Full Stack Software Developer (Intern)

FEB 2026 – JUN 2026

Opsie Software Solutions Inc. — Mandaluyong City, Philippines

- Engineered a full-stack enterprise-grade ticketing and user management platform designed for internal support operations, issue tracking, and team collaboration using Node.js and Express with JWT authentication backed by MongoDB and React with TypeScript for the UI styled with Tailwind CSS.
- Designed and developed a full-stack job application system built with Node.js, Express, and TypeScript, featuring a modular OOP backend and a modern, responsive React frontend.
- Architected and developed a production-ready enterprise communication platform backend from scratch, addressing the lack of secure, auditable internal messaging in corporate environments. Designed a multi-tenant REST API and WebSocket server built with Node.js, Express.js, PostgreSQL, Socket.IO, WebRTC, AWS S3/MinIO, and JWT.

Data Annotator / Analyst (Independent Contractor)

FEB 2024 – JUN 2025

Peropyx — Work From Home

- Evaluated ad relevance to user queries and annotated image deserving queries in search engines.
- Determined patterns within user behavior on a streaming platform.
- Assessed the quality of a response from a virtual voice assistant.
- Reviewed mapping data for digital mapping applications.

EDUCATION

Bachelor of Science in Information Technology (2026)

STI College Pasay-EDSA — Pasay City, Metro Manila
